Art Unit: 3731

DETAILED ACTION

Acknowledgement is made of the amendment filed 2/16/2010, amending claims 1 and 14, canceling claims 9-13 and 17-20, and adding claims 30-33. Accordingly, claims 1-8, 14-16 and 21-33 are currently pending and presented for examination.

Claim Rejections - 35 USC § 102

 The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claims 1-8, 14-16 and 21-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Welt et al. (US 5,984,935).

Regarding claim 1, Welt discloses a non-shaving head (4) which in use is capable of being moved over the skin to effect removal of the composition; a handle (6) having a broadened end distal from the non-shaving head (fig. 7); and a joint between the head and the handle, permitting an articulation of the head about the handle, the joint being defined by an opening oriented upward when used to effect the removal of the composition (fig. 7; column 3, lines 47-53); wherein both the non-shaving head and the handle have a downward concave curvature profile when used to effect the removal of the composition, the downward concave curvature profile of the handle extending along a majority of the length of the handle (fig. 7).

Application/Control Number: 10/560,191

Art Unit: 3731

Regarding claim 14, Welt discloses a non-shaving head (4), the head comprising a planar surface (the blade 10) comprising a flat top surface and a flat under surface, the planar surface ending in a single straight edge (column 3, lines 7-11); a handle (6) having a broadened end distal from the head (fig. 7); and a single joint between the handle and the head having an upward opening that limits articulation of the head with respect to the handle during use in removing compositions (column 3, lines 47-53); wherein both the non-shaving head and the handle have a concave curvature profile relative to the tissue during use, the concave curvature profile of the handle extending along a majority of the length of the handle (fig. 7).

Regarding claims 21, 22 and 29, Welt discloses a device for removing a composition, the device comprising: a non-shaving head (4) with a concave profile; a handle (6) having a curvature profile and a broadened end distal from the non-shaving head, the curved profile defining a downward concave curvature that extends along a majority of the length of the handle (fig. 7); and a joint comprising an upwardly open V-shaped notch between the head and the handle, permitting an articulation of the head about the handle (column 2, lines 47-53).

Regarding claims 2, 15 and 23, Welt discloses the device wherein there is a resistance force acting against articulation of the head, which resistance force increases as the articulation increases (column 3, lines 47-53).

Regarding claims 3 and 24, Welt discloses the invention wherein the head comprises an articulation about the handle through an angle in the range of 10 to 40° (fig. 7).

Application/Control Number: 10/560,191

Art Unit: 3731

Regarding claims 4 and 25, Welt essentially discloses the device wherein when the force, causing articulation of the head, is reduced or removed the head is able to recover a previous or original position (fig. 7).

Regarding claims 5-7 and 26-28, Welt discloses the device being unitary and made of plastic (column 2, lines 40-44) wherein the handle is substantially rigid, the head is substantially rigid, and the joint is the only source of articulation (column 3, lines 47-53).

Regarding claims 8 and 16, Welt discloses the invention wherein the joint is formed by a web of plastic material at the base of an upwardly open notch between the handle and the head (column 2, lines 40-44).

Regarding claims 30, 32 and 33, Welt discloses wherein the head has a rigid, non-conforming leading edge that effects the removal of the composition (column 3, lines 7-11; wherein Welt also teaches conforming edges (column 3, lines 34-46); therefore, all other edges are non-conforming and made of rigid plastic).

Regarding claim 31, Welt discloses wherein the upward opening closes when a downward force, to effect the removal of the composition, is applied to the handle, and wherein the closure of the upward opening limits the articulation of the head about the handle (fig. 7; column 3, lines 47-53; wherein the opening inherently closes to some extent as the head is moved).

Art Unit: 3731

Response to Arguments

Applicant's arguments with respect to claims 1-8, 14-16 and 21-33 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SARAH A. SIMPSON whose telephone number is 571-270-3865. The examiner can normally be reached on Monday - Friday 8 am - 5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan Nguyen can be reached on 571-272-4963. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
